

3–4 Minute Project Demonstration Video Instructions to be uploaded on Projexa

1. Introduction (30–45 seconds)

- **Introduce yourself:** State your name, course, and project title.
- **Brief overview:** In one or two sentences, describe what your project is and what problem it solves or how it helps users.
Example: “This project helps users manage their daily expenses efficiently using automated tracking and data visualization.”

2. Project Description (45 seconds – 1 minute)

- **Motivation:** Explain *why* you chose this project and what problem or need it addresses.
Example: “I noticed that many people struggle to track their spending habits, so I created this tool to make it easier.”
- **Technologies Used:** Mention the main technologies/frameworks (e.g., Python, React, Firebase, etc.).
- **Key Features:** Quickly list 2–3 major features that make your project stand out.
Example: “The app features user authentication, expense categorization, and real-time data visualization.”

3. Demonstration (1½ – 2 minutes)

- **Show your project in action:**
 - Open the project and walk through the main interface or homepage.
 - Demonstrate how a user interacts with it (e.g., entering data, clicking a button, generating output).
 - Explain briefly what’s happening at each step.
Example: “Here, the user logs in, adds an expense, and the chart updates automatically to show spending by category.”
- **Optional:** Briefly show or mention an interesting part of your code (like a core algorithm or database connection).

4. Challenges and Solutions (30–45 seconds)

- Mention **1–2 main challenges** you faced during development.
Example: “I initially struggled with connecting the backend database.”
- Briefly explain **how you solved them**.
Example: “I learned how to configure Firebase authentication properly to fix that issue.”

5. Conclusion (20–30 seconds)

- Summarize your project’s purpose and its impact or future potential.
Example: “In summary, this project helps users take control of their finances. In the future, I plan to add AI-based budgeting suggestions.”
